

Environmental Policy

Display International Schwendinger GmbH & Co. KG

Display International in Würselen is committed to protecting the environment.

Our goal is to prevent environmental impacts wherever possible. If this is not possible, we want to continually reduce environmentally harmful emissions, waste generation, noise and energy and resource consumption with the help of the best available technology in each case insofar as this is economically feasible.

We ensure proper and certified waste transport and proper waste disposal. We check and assess the environmental impacts of our operating processes, services and products and endeavour to continually improve them while taking into account economic appropriateness.

We take all measures to prevent environmental disruptions and accidents or to keep their impacts as low as possible. Cooperation with the relevant authorities is second nature to us.

We are committed to complying with the environmental laws that are relevant to our company as well as to the established binding obligations. In order to meet this standard in all areas of the company at all times, a comprehensive environmental management system has been established, applied, maintained in accordance with DIN EN ISO 14001, and further developed within the context of continuous improvement.
